

OUR COMPANY

We are a Maine-based full-service professional IT consulting firm founded in 1982. We have successful client relationships spanning decades, achieved by providing the highest quality technical services from our long-term permanent staff of expert consultants.

OUR COMMITMENT

One of the easiest ways to lose a good reputation is to attempt projects that are outside your field of expertise. When we propose our services, we deliver only the highest quality possible. If you require skills that lie beyond our ability to achieve this level of quality, we will recommend, refer, or obtain other resources to ensure the success of your project; never over-selling our skills just to get business. We believe this fosters a stronger relationship based on honesty and integrity.

OUR LEADERSHIP

Here are a few questions you should consider asking service providers. Find out how we respond to these:

“Do you specialize in IT consulting services, or do you spread your resources across multiple fields?”

“Are you a service provider, or a broker of services?”

“Can you independently suggest the best solution, or are you tightly affiliated with a particular vendor?”

“What is the depth and breadth of your expertise in multiple industries and technical environments?”

WHY MASON ASSOCIATES?

40+ Year Reputation of Providing Quality Services

- Long Record of Success Demonstrates Stability for the Future
